

Virtual Career Fair

Arkansas, Grant and Jefferson County
Manufacturing Entities

What is a Virtual Career Fair?

Arkansas River Education Service Cooperative (ARESC) provides a brief corporate profile for manufacturing companies within our cooperative area.

The profiles follow a template that has concise one-page information for each company including the general corporate description, a link to company history, a link to an application site and job openings for the company, and a map showing ARESC area locations.

Who can utilize the information?

The manufacturing profiles may be used by

- students who are exploring job opportunities within our tri-county area,
- instructors that are developing a career exploration unit of study for the classroom, and
- parents who are assisting their secondary students in a job search.

How are the profiles developed?

Manufacturing entities within our cooperative three-county area (Arkansas, Grant and Jefferson) that have participated in our annual Arkansas River Education Service Cooperative Career & Technical Education Regional Advisory Meetings are the initial businesses included in the corporate profiles.

The information listed for each profile was derived directly from each corporate website. Since every business has their own procedure for job application submission, the application information and site URL is included for easy reference.

We realize that websites are updated on occasion. Initial profiles were developed in April 2020. If you discover that a profile website URL has changed, please feel free to contact Kelli Cypert at cypertk@aresc.k12.ar.us.

Can additional industry profiles be requested?

Yes! If you are interested in a local company that does not yet have a profile posted to our site, or if you would like to suggest an addition, please contact Kelli Cypert at cypertk@aresc.k12.ar.us. Kelli will be glad to assist you.
